

PP SPIRAL GUARD

Description

Material:

extruded high density polyethylene (HDPE)

Temperature:

-25°C to +80°C (-13°F to +176°F)

Application Fields:

It is widely used to protect various hoses, such as hydraulic hoses, rubber hoses.

Product features:

Resistant to acids, oils and solvents

UV resistance and abrasion resistant

Protect hose increases usable life

Flame retardant and anti-static
