

SILICONE FIRE SLEEVE

Description

Inner layer:

high purity thickened non-alkali fiberglass

Cover:

silicone resin coating

Temperature:

260-300°C (outside), 500-60°C (inside)

1.D	Wall Thickness	Length
mm	mm	m

6.5	1.6	20
8.5	1.8	20
10.5	2	20
12.5	2	20
15.5	2.1	20
20.5	2.4	20
25.5	2.6	20
30.5	2.9	20
35.5	3.1	20
40.5	3.4	20
45.5	3.4	20
51	3.6	20
56	3.7	20
61	3.8	20
66	3.8	20
71	4	20
76	4.1	15
81	4.3	15
86	4.3	15
91	4.5	15
101	5	15

Application Fields:

It is widely used for construction machinery that need high temperature protection and a variety of pipeline line protection.

Product features:

Resistant to acids, oils and solvents
High temperature resistance
Flame retardant and anti-static
Heat insulation and electrical insulation
